Access Addiction and Mental Health (AAMH) Telephone Line

AHS has established Access Addiction and Mental Health (AAMH) telephone line for clients in central, northern and southern Alberta, who will benefit from guidance in finding the most appropriate mental health, addictions and/or recovery services and resources.

Anyone requiring addiction and mental health services, treatment, or recovery options in central, northern, or southern Alberta can now call AAMH at:

1-888-594-0211

Monday to Friday 8:30 a.m. to 4:30 p.m.

AHS staff will complete an interview with the client, over the phone, and match clients to the most appropriate resource. Staff of the AAMH line can even book clients an appointment if required, decreasing wait times and ensuring clients are supported in accessing the appropriate services for their needs, right away. Staff can also connect clients with a broader scope of services across

Home Safety— Alarms Save Lives

Smoke alarms

A smoke alarm is very important for keeping your home safe, when properly installed, tested, and maintained, gives you an early warning of a fire so you have a better chance of getting out.

Where should smoke alarms be located?

The two important things to remember when deciding where to put smoke alarms are that most fires start in the kitchen and smoke alarms are to warn people asleep in bedrooms. At least one smoke alarm should be installed on every level of your home, including the basement (but not in unfinished attics).

- Put smoke alarms in the hallways that lead to each bedroom.
- On floors without bedrooms, install the smoke alarm in or near each living area.
- Put a smoke alarm on the ceiling at the bottom of any staircase leading to upper floors. Mount the smoke alarm high on walls or ceilings (remember—smoke and hot gases rise).

How do I care for a smoke alarm?

Keep smoke alarms clean, because dust and grime may affect how they work.

- Replace the batteries at least once a year
- Replace a smoke alarm **every 10 years**, or sooner if it isn't working.
- Regularly dust or vacuum your smoke alarms.

Carbon Monoxide (CO) Alarms

Often called the invisible killer, carbon monoxide is an odorless, colorless gas created when fuels (such as gasoline, wood, coal, natural gas, propane, oil, and methane) burn incompletely. The following are some safety tips:

- CO alarms should be installed in a central location outside each sleeping area and on every level of the home and in other locations where required by applicable laws, codes or standards. For the best protection, interconnect all CO alarms throughout the home. When one sounds, they all sound.
- Follow the manufacturer's instructions for placement and mounting height.
- Choose a CO alarm that has the label of a recognized testing laboratory.
- Call your local fire department's non-emergency number to find out what number to call if the CO alarm sounds.
- Test CO alarms at least once a month; replace them according to the manufacturer's instructions.
- If the audible trouble signal sounds, check for low batteries. If the battery is low, replace it. If it still sounds, call the fire department.
- If the CO alarm sounds, immediately move to a fresh air location outdoors or by an open window or door. Make sure everyone inside the home is accounted for. Call for help from a fresh air location and stay there until emergency personnel.
- If you need to warm a vehicle, remove it from the garage immediately after starting it. Do not run a vehicle or other fueled engine or motor indoors, even if garage doors are open. Make sure the exhaust pipe of a running vehicle is not covered with snow.
- During and after a snowstorm, make sure vents for the dryer, furnace, stove, and fireplace are clear of snow build-up.
- A generator should be used in a well-ventilated location outdoors away from windows, doors and vent openings.

Gas or charcoal grills can produce CO — only use outside.

Peace Valley Snow Riders - Trail Staging Points

Peace Valley Snow Riders have worked diligently to promote responsible snowmobiling in the area and in particular, to develop trails which are intended to form a network on both the east and west side of the Peace River. In addition to providing another recreational venue for current residents that focuses on the positive aspects of our abundant winters, it is anticipated these trails will assist in retaining and enticing residents and businesses to the Peace Country. They now have 4 great trails in different areas, two of them connect (Smithmills & Hines Creek). Smithmills has been extended by 19.2 km creating a loop and community access to local area around Last Lake guest ranch.

Check out <https://peacevalleysnowriders.com/> for more information on the trails, maps, and membership information.
